

# Uylong Song

## Frontend Developer Experience

### CamboConnect

Jan 2025 ~ Present

#### Full-Stack Developer

- Designed and developed the entire web application from frontend to backend using Next.js, Tailwind CSS.
- Created highly responsive, SEO-friendly, and fast-loading user interfaces . resulting in strong SEO rankings and excellent performance scores.
- Built robust backend API integrations and implemented server-side rendering and static generation for optimal performance and dynamic content delivery.
- Managed global and local application state efficiently using Zustand, ensuring smooth and scalable state management.
- Architected and implemented new features across the stack, delivering a seamless and engaging user experience.
- Utilized built-in methods for routing and data fetching with TypeScript for type safety and maintainability.

### CodeForCambodia

Nov 2024 ~ May 2025

#### Frontend Developer Intern

- Built responsive and animated user interfaces using React.js and Tailwind CSS, resulting in a 30% improvement in load times
- Developed new features for web applications using React, increasing application functionality by 25%
- Worked with backend APIs to fetch and display data dynamically, enriching the user experience
- collaborate effectively with a team and adapted to the startup environment.
- Utilized Git for version control, collaborating through feature branches, team-based development workflow.
